

ABOUT US

Founded in 1995, Bi-Search Int'l (BSI) operates worldwide as a provider of leading-edge LCD display solutions and offers the highest quality of digital signage products for a variety of industries such as medical, POS/Kiosk, aerospace, automotive, industrial, gaming, advertisement, military and more.

As a distributor of LCD Displays, BSI also offers touch screens, controllers, AD boards, LED drivers, inverters, and embedded PC solutions. Our dedicated team of engineers and sales account managers work side-by-side with you to customize products through services like optical bonding, LED backlighting, touch screen integration, and lamination of AG & AR films.

Whether you are looking for LCD panels or customized display solutions, BSI's team will accommodate your requests and exceed your expectations.

AUTOMOTIVE MARKET

The demand for automotive LCD displays increases every year. Monitors are very popular in applications such as navigation, multi-functional monitors, and rear set entertainment.

BSI is ready to attend the demand by offering customized solutions and LCD displays that meet specific requirements, including glare resistance, wide temperature, shock and vibration resistance, and touch screen with optical bonding that improves display performance, structural integrity, and design flexibility.
