

C3Nano at SID Vehicle Displays & Interfaces in Detroit

C3Nano is an advanced materials manufacturer of transparent conductive inks and films serving a wide range of automotive and electronic applications. C3Nano's state-of-art conductive inks and films deliver superior performance for display touch, formable and curve-able devices, transparent heaters for automotive (LiDAR/camera, windshield, side mirror, headlight, bumper) and other products. Founded in 2010, C3Nano's investors and supply chain partners include Nitto Denko, Nissha, Hitachi Chemical, Lens Technology, Nagase America, and a top automotive tier-1 company. C3Nano is headquartered in Silicon Valley, California with manufacturing operations in Hayward, CA, and Changzhou, China, along with technical sales support in Frankfurt, Germany and throughout Asia.
